

# Food packaging template

Can you make your own food packaging following the instructions below? Remember to include all the different things that can make a food product stand out from others; for example name, slogan and healthy ingredients. Be careful when you use the scissors to cut out the box template.

## You will need glue and scissors

- 1 Glue the *Food packaging template* on to card.
- 2 When it is dry, cut out the box template and fold the dotted lines.
- 3 On the sides labelled A, glue carefully and tuck in. Your box will now be taking shape.
- 4 Fold and tuck in the sides labelled B.
- 5 Glue the sides labelled C and tuck in.
- 6 Tuck in the remaining sides.
